An aerial photograph of Yazd, Iran, showcasing its unique desert architecture. The city is a dense collection of mud-brick buildings with flat roofs. In the foreground, a large, prominent building features a dome with intricate blue and white geometric tilework. The background shows a vast expanse of similar buildings stretching towards the horizon under a clear sky.

HERE IS YAZD

UNESCO's World Heritage City

An aerial photograph of a historic city, likely Isfahan, Iran, showing a dense cluster of traditional mud-brick buildings. A prominent tall, slender minaret with a blue and white tiled upper section stands on the left. In the lower right, a large building with a blue-tiled dome is visible. The foreground shows a street with a few cars and a large, open area with many small, rounded, dome-like structures. The text "Feel the Atmosphere of Peace and Tranquillity" is overlaid in the center.

Feel the Atmosphere of Peace and Tranquillity

Welcome to the Heart of History

Yazd is one of the oldest cities in the world with a history spanning over 5,000 years which has remained remarkably intact throughout the centuries. Located in central Iran, it has a population of over one million people. Separated from modern areas, the historic part of the city with its earthen architecture, has been carefully conserved and protected. The historic city of Yazd was inscribed on UNESCO's World Heritage List in July 2017. Yazd is known as the oldest earthen city in the world and the second most historic city in the world, after Venice, Italy.

Living in Yazd

Thanks to its location, Yazd has remained largely immune to the ravages of history wars. Visitors often appreciate the atmosphere of peace and tranquility that permeates the city. The calm pace of life, high safety, and cleanliness make Yazd a peaceful place to live. Compared to other large cities, the cost of living in Yazd is relatively low.

People

The people of Yazd have preserved the honesty, civility, and dignity of their ancestors and are well-known for their modesty and hospitality. They speak Persian with a sweet Yazdi accent and are mostly Muslims while Jewish, Zoroastrian, and Christian minorities peacefully coexist in the province.

Weather

Spring and autumn bring mild weather, and most of the rainfall occurs during these seasons, making them popular times for tourists to visit. Summer is typically very hot and dry in Yazd, with the sun shining almost continuously during the day. In winter, the days remain mild and sunny, but mornings can be cold due to the thin air and low cloud cover, with temperatures sometimes falling below 0 °C.

Education

For 23 consecutive years, Yazd has ranked first in terms of the number of students passing the National University Entrance Exam, thanks to its high-quality schools and skilled instructors. Yazd is the birthplace of many renowned politicians, international leaders, scientists, poets, writers, and artists.

Dowlat Abad Garden

Unless stated otherwise, photos of Yazd are obtained from Yazd Cultural Heritage, Handicrafts and Tourism Organization.

Tourism Destination

Yazd is a must-see city for tourists and is consistently ranked among the top five destinations in Iran. Beyond its rich historical heritage, Yazd is also one of the most developed cities in the country. Traditional hotels in the historic district as well as luxurious accommodations in the modern areas host both international and domestic tourists.

Walking through the old living town, sightseeing, visiting museums, enjoying nature, and exploring the desert all create memorable moments for visitors during their stay in Yazd.

Yazd: Where Desert Meets Green

Visitors can enjoy an unforgettable experience on Desert Tour while being amazed by the greenness of the countryside just 40 km away from the city.

Health Care System

Regarding health indicators and the distribution of medical resources, Yazd is one of the top developed cities in Iran. Committed and devoted health professionals along with specialized health care and clinical facilities, combined with relatively low medical costs, have made Yazd a leading destination for medical tourism, attracting a significant number of both international and domestic patients.

Economy

Historically renowned for its high-quality silk and carpets, Yazd is one of Iran's key industrial hubs. The city boasts 14 major industrial zones, a special economic zone, and 15 primary agricultural areas, making it one of the most technologically advanced cities in the country. Yazd is home to Iran's largest fiber optics manufacturer, as well as the country's main producers of ceramic floor tiles and textiles.

The city was officially recognized as the world city of traditional and handcrafted jewelry in 2025 by WCC.

Time-honored Confectioneries

With its diverse, delightful, and healthy sweets, Yazd is recognized as the confectionery capital of Iran with international popularity. The city is also the leading producer of sesame-based products in the country. Visitors can enjoy reasonably priced meals in charming restaurants offering both Iranian and international cuisine.

Shirkooh

4000 year-old Cypress of Abarkuh
The second oldest tree in the world

Zoroastrians Fire Temple (Atashkadeh)
The fire on the inside has been burning continuously for over 1500 years.

10
Chak Chak
The sacred pilgrimage site for Zoroastrians from around the world

The Great Mosque (Masjed Jame)

An architectural masterpiece that dates back over 900 years, featuring the tallest minarets in Iran.

Iranian Education System

The education system in Iran, prior to university, is divided into two main levels: primary and secondary (high school) education. Iranian children spend six years in primary school from ages 6 to 12, and attend secondary school from ages 12 to 18. Primary education is compulsory in Iran. There are both free public schools and private schools available. In Iran, all schools are unisex. To enter higher education, students must obtain a high school diploma and pass the national university entrance exam. Higher education continues at the university level, offering various degrees as shown in the following chart:

School years	Primary School	6 years
	Secondary School	6 years
University Entrance Exam		
Higher Education	Associate Degree	2 years
	Bachelor's Degree	4 years
	Master's Degree	2 years
	Ph.D.	4 years
	General Medicine	7 years
	Dentistry/Pharmacy	6 years
	Medical/Dental specialty	4 years
	Subspecialty	2 years

The requirement to enter into a higher degree is to pass the related entrance exam.

Shahid Sadoughi University of Medical Sciences

The origins of medical education can be traced back over 700 years to the city of Yazd. However, within an academic context, Shahid Sadoughi University of Medical Sciences was established in 1983, initially enrolling 45 medical students. To date, SSU has graduated over 23,000 healthcare professionals in diverse fields of medicine, dentistry, pharmacy, health sciences, nursing, midwifery, paramedical sciences, and Persian medicine. In accordance with the structure of Iran's Health Care System, Medical Sciences University within each province bears responsibility for overseeing the entirety of the province's health care delivery and related educational activities.

The University provides services across six sectors including:

- Higher education
- Research and technology
- Student services and cultural affairs
- Community health services
- Clinical affairs related to hospitals, clinics, and diagnostic centers
- Food safety and pharmaceutical regulations

WHY SSU?

Located in **UNESCO World Heritage** City of Yazd

Offering a **wide range of programs** in medical sciences and health services

Flexible **blended learning** for postgraduates

Affordable education for international students

Ranked in **Times Higher Education** (THE)

Recognized as a **Center of excellence in infertility treatment** and reproductive medicine

A pioneer in **medical tourism** in the region

AT A GLANCE

SPECIAL MEDICAL SERVICES

State-of-the-art **infertility treatment** services

Advanced cardiovascular surgeries including:

- Transcatheter Aortic Valve implantation (**TAVI/TAVR**)
- **24/7** Emergency Cardiac Catheterization and **PCI** Services
- **Open-heart** surgery

Organ transplant program:

Heart, Kidney, Bone marrow, Liver, and Cornea

Arthroplasty and advanced joint replacement surgeries

Complex **trauma surgery** program

Advanced **neonatology** and high-risk newborn care services

Advanced **neurosurgical** services

YAZD REPRODUCTIVE SCIENCES INSTITUTE

Founding Chair: **Prof. Abbas Aflatoonian**

Established in 1989 as the first IVF Center in Iran, Yazd Reproductive Sciences Institute is the pioneering center for advanced infertility treatments in Iran and the home of the country's first IVF baby, born in 1990.

Recognized nationally as a scientific hub and center of excellence, the institute provides cutting-edge services in infertility care, stem cell research, and reproductive genetics. Each year, more than 14,000 couples from across the country and beyond seek treatment here.

The institute also publishes International Journal of Reproductive BioMedicine indexed in ISI and PubMed international databases.

Achievements:

THE
FIRST
ST

- Iranian **IVF** baby, 1990
- Iranian **IUI** baby using Retrograde Ejaculation, 1992
- Iranian baby using **Egg Donation**, 1994
- Iranian **ICSI** baby, 1995 (only 3 years after the world's first ICSI baby)
- Iranian baby using Epididymal sperm and Microinjection (**PESA**), 1996
- Iranian baby using Testicular sperm and Microinjection (**TESE**), 1997
- Iranian baby **frozen embryo**, 1997
- Iranian baby using Testicular Round Spermatid and Microinjection, 1998
- Iranian **IVM** baby, 2007
